Statement regarding the use of isinglass products as processing aids in organic products

AB Vickers' dry isinglass products (Vicfine, Cryofine, Floc, Drifine) and liquid isinglass products do not contain genetically modified organisms or materials.

The following list of raw materials is used to produce AB Vickers' isinglass products:

isinglass (which has been washed in hydrogen peroxide)
phosphoric acid
malic acid
citric acid
sodium metabisulphite
potassium metabisulphite
water

Therefore we believe that the above isinglass products are suitable for use as processing aids during the production of organic beverages.

A small image showing a handwritten signature in black ink on a white background. The signature is written in a cursive style and includes the name 'John Littlewood'. A small 'ab vickers' logo is visible in the top right corner of the image.

John Littlewood
Quality Manager
