

## Statement

July 5, 2017

Valid one year from date of issue

### To whom it may concern

### Organic approval for Viniflora® wine yeast

Thank you for your inquiry into Chr. Hansen's products.

We are pleased to inform you that according to Regulation (EC) No 889/2008 laying down detailed rules for the implementation of Council Regulation (EC) No 834/2007, as regards detailed rules on organic wine EU legislation; the use of our yeast wine cultures is approved for organic wine production. Yeast cultures are also approved for organic use, complying with CE 834/2007 and NOP regulations by Ecocert.

Briefly; if a wine yeast is not available with its 'organic equivalent' (same species and strain) then organic producers have the right to use the non-organic version of the yeast containing E491.

As there is no equivalent of our wine yeast range in an organic version on the market, our full range of yeasts is suitable for organic production.

If you have further questions, please contact us.

Yours sincerely

Chr. Hansen A/S - Food Cultures & Enzymes
