SECUJET® 2.0
Precoat candle filter

The smart candle filter for precoat filtration

- Compact design
- Easy handling
- High flexibility
Characteristics
The SECUJET® 2.0 is the advanced version of the former Secujet candle filter but with hanging candles from a top plate. The design of the filter and the usage of the same STABOX candles (25 mm diameter) make it the small version of the large SYNOX® filters.

Applications
The SECUJET® 2.0 was developed with the focus on the rising amount of small Craft-Breweries worldwide and their increasing demand for filtered beer. But also for any other beverage to be filtered with filter aid like diatomaceous earth this filter will be a reliable solution.

Advantages
– compact skid mounted design
– movable with wheels
– low water and energy consumption
– long service life due to high quality design
– very little maintenance required, no moving parts inside
– efficient cleaning device inside the vessel
– dosing pump separately mounted on the skid for easy maintenance

Candle cleaning

STABOX® candle
1 Spiral of V4A
2 Calibrated openings
3 High resistance
4 No obstructions during filtration
5 Perfect cleaning
### Characteristics

- **Applications**
  - efficient cleaning device inside the vessel
  - very little maintenance required, no moving parts inside
  - low water and energy consumption
  - movable with wheels
  - compact skid mounted design

### Advantages

- Maintenance
- Cleaning
- Candle

#### STABOX® candle

- High resistance
- Calibrated openings
- Spiral of V4A
- Perfect cleaning
- No obstructions during filtration
