<b>Section 5 - FIREFIGHTING MEASURES</b>	
<p><b>5.1 Extinguishing Media</b>  Suitable Extinguishing Media: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.</p> <p><b>5.2 Special hazards arising from the substance or mixture</b>  No further relevant information available.</p> <p><b>5.3 Advice for firefighters</b>  As in any fire, wear NIOSH-approved self contained breathing apparatus and appropriate protective clothing.</p> <p>Product as supplied and shipped is highly unlikely to release sufficient dust to constitute a combustible dust explosion hazard. Depending on airborne concentration, moisture content, particle diameter, surface area and exposure to an ignition source, airborne dust may ignite and burn with explosive force in a contained area.</p>	
<b>Section 6 - ACCIDENTAL RELEASE MEASURES</b>	
<p><b>6.1 Personal precautions, protective equipment and emergency procedures</b>  Avoid inhalation of dust.</p> <p><b>6.2 Environmental precautions</b>  None, discharge in accordance with federal, state and local laws.</p> <p><b>6.3 Methods and materials for containment and cleaning up</b>  If large amounts of dust are generated, collect with vacuum or suppress with water spray and sweep up. Minimize compressed air blowdown or other practices that generate high dust levels.</p> <p>See Section 8 for appropriate personal protective equipment.</p>	
<b>Section 7 - Handling and Storage</b>	
<p><b>7.1 Precautions for safe handling</b>  Avoid generating excessive dust. If dust levels are suspected to be over PEL, wear a NIOSH approved N95 or greater respirator. Protect from excessive moisture. Maintain good housekeeping practices. Avoid contact with eyes, skin and clothing. See Section 8 for more information</p> <p><b>7.2 Conditions for safe storage, including any incompatibilities</b>  Store in original container or clean, covered container. Store in cool, dry, well-ventilated area. Product should be kept sealed and dry.</p> <p>See Section 8 for OSHA permissible exposure limit(s)</p>	
<b>Section 8 - EXPOSURE CONTROL / PERSONAL PROTECTION</b>	
<p><b>8.1 Control parameters</b>  This product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.</p> <p><b>8.2 Exposure controls</b></p> <p><b>Normal Handling Conditions</b></p> <p>Engineering Controls: If necessary use ventilation system to keep airborne dust concentration below permissible exposure limits. Ventilation to control dust should be considered where potential explosive concentrations and ignition sources are present. The design and operation of any exhaust system should consider the possibility of explosive concentrations of cellulose dust within the system.</p> <p>Ensure that exhaust ventilation and material transport systems involved in handling this product contain explosion relief vents or suppression systems designed and operated in accordance with applicable standards if the operating conditions justify their use.</p> <p>Respiratory Protection: If dust levels are suspected to be over PEL, wear a NIOSH approved N95 or greater respirator.</p> <p>Eye Protection: ANSI Z87+ approved dust goggles or safety glasses, if necessary, to avoid eye irritation.</p> <p>Skin Protection: Cover skin with clothing and/or gloves if skin dryness or irritation occurs.</p> <p>General Hygiene: Maintain good housekeeping practices, wash hands after handling, avoid direct eye contact. Clean up areas where dust settles to avoid excessive accumulation of this combustible material. Minimize compressed air blowdown or other practices that generate high airborne-dust concentrations.</p>
