4. FIRST AID MEASURES

In case of unintended overexposure, the following measures apply

**Inhalation**
- **Effects**: May cause allergic respiratory reaction
- **Symptoms**: Shortness of breath, wheezing and coughing
- **First Aid**: Remove person to fresh air. If signs/symptoms continue, get medical attention. Show this safety data sheet to the doctor in attendance

**Skin Contact**
- **Effects**: May cause slight irritation.
- **Symptoms**: Slight irritation.
- **First Aid**: Remove and wash contaminated clothing before re-use. Wash off immediately with plenty of water. If symptoms persist, call a doctor. Show this safety data sheet to the doctor in attendance.

**Eye Contact**
- **Effects**: May cause slight irritation.
- **Symptoms**: Slight irritation.
- **First Aid**: Hold eye open and rinse slowly and gently with water for 15-20 min. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. If symptoms persist, call a doctor. Show this safety data sheet to the doctor in attendance.

**Ingestion**
- **Effects**: Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.
- **Symptoms**: Irritation
- **First Aid**: Rinse mouth with water and drink plenty of water. If symptoms persist, call a doctor. Show this safety data sheet to the doctor in attendance.

5. FIRE-FIGHTING MEASURES

**Flammable Properties**: Slightly flammable according to HMIS criteria
Suitable Extinguishing Media
Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide

Unsuitable Extinguishing Media
None

Hazardous Combustion Products
None

Specific Hazards Arising from the Chemical
May cause allergic respiratory reaction

Protective Equipment and Precautions for Firefighters
Self-contained breathing apparatus and standard turn-out apparel

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions
For personal protection see section 8

Environmental Precautions
Collect spillage.

Methods for cleaning up
Avoid formation of dust and aerosols
Spilled preparation should be removed immediately to avoid formation of dust from dried preparation. Take up by mechanical means preferably by a vacuum cleaner equipped with a HEPA (High Efficiency Particulate Air) filter. Flush remainder carefully with plenty of water. Avoid splashing, high pressure washing or compressed air cleaning to avoid formation of aerosols. Ensure sufficient ventilation. Wash contaminated clothing.

For personal protection see section 8

7. HANDLING AND STORAGE

Handling
Avoid formation of dust and aerosols
Ensure adequate ventilation
Liquid enzyme preparations are dustfree preparations. However, inappropriate handling may cause formation of dust or aerosols.

Storage
Keep tightly closed in a dry and cool place. Temperature 0-10 °C (32-50 °F)

Occupational exposure controls

Engineering Controls
Ensure adequate ventilation, especially in confined areas
Maintain good conditions of industrial hygiene. Some processes may require enclosures, local exhaust ventilation, or other engineering controls to control airborne levels. Additional handling and healthy/safety information is available upon request.

**Personal Protective Equipment**

**Respiratory Protection**  
In case of insufficient ventilation wear suitable respiratory equipment that meets HEPA/P100 specifications.

**Eye Protection**  
Safety glasses with side-shields.

**Skin and body protection**  
No special technical protective measures are necessary.

**General Hygiene Considerations**  
Handle in accordance with good industrial hygiene and safety practices.

**Environmental exposure controls**  
Local authorities should be advised if significant spillages cannot be contained.
