

MicroEssentials Boost-TR™

Product Data Sheet

Product Description

Micro**Essentials** Boost-TR is a *time-release* yeast nutrient specially designed for wine fermentations. The product consists of 1.5 inch tablets intended for direct addition to juices or musts. The unique *time-release* system provides high levels of inorganic nitrogen and low levels of organic nitrogen, vitamins and trace minerals in a sustained manner, thus assuring timely supplementation and proper management of the fermentation.

The convenience of Micro*Essentials* Boost-TR offers winemakers ultimate control in supplementing juices and musts throughout fermentation with <u>one</u> single addition. Utilizing Micro*Essentials* Boost-TR offers similar fermentation kinetics compared with incremental nutrient additions.

Application

Micro**Essentials** Boost-TR is suggested as a supplement to Micro**Essentials** Complete-TR[™] when additional inorganic nitrogen is desired. Micro**Essentials** Boost-TR can be used separately in easy fermentation scenarios when mainly inorganic nitrogen supplementation is required. Micro**Essentials** Boost-TR is recommended for use in both red and white juices and musts. This product was designed for ease of use; therefore, to achieve full nutritional benefits, Micro**Essentials** Boost-TR should be added at yeast inoculation. Micro**Essentials** Time-Release Technology eliminates the need for multiple additions.

This product is ideal for winemakers who traditionally supplement with diammonium phosphate. Micro*Essentials* Boost-TR provides 19ppm available nitrogen at 1 lb / 1,000 gal.

Instructions for Use

Add Micro Essentials Boost-TR directly to juices or musts at yeast inoculation. Do NOT dissolve in water.

Based on a standard addition of 2 lbs / 1,000 gal, Micro Essentials Boost-TR should be added as follows:

- · Large fermentations use 1 b ox (10 kg / 22 lbs) per 11,000 gal
- Macro bins (175 gal) use 7 tablets
- Barrel ferments (~ 60 gal) use 3 tablets

For further recommendations on dosage, or dosage based on YAN values, please contact a Gusmer representative - or refer to the *Gusmer Nutrient Addition Chart* in the wine product catalog or at <u>www.gusmerwine.com</u>.

Technical Data

Addition Level

Recommended dosage is 2 - 8 lbs / 1,000 gal

- Storage and Shelf Life
 Store in a cool, dry, well-ventilated area
 - Shelf life at least 18 months if stored under recommended conditions
- Appearance
 White colored tablets with yeast-like aroma

Packing

Micro *Essentials* Boost-TR is available in 10 kg boxes and 1 kg boxes.

Product Specifications

Typical Analysis	Specification
Protein	0 - 10%
Nitrogen	12 - 16%
Moisture (probe)	12% max
pH (5% solution)	6.5 - 8.0

Microbiological	Specification
Total Bacteria Count	< 20,000 / g
Yeast and Mold	< 100 / g
Coliform Organisms	< 10 / g
E. coli	Negative
Salmonella	Negative
