

mbt Brautechnik – The insiders' tip for brewers

A company founded 15 years ago on a dream and the passion to provide brewers with sensible technology, is now a seasoned supplier and a popular option with those “in the know” inside the brewing industry:

mbt Brautechnik, based in Nordheim am Main - Germany, has delivered successful projects inside Germany and around the globe – for breweries of all sizes, from small Craft Breweries to International Brewery Groups. We manufacture our equipment as if it was for our own brewery. It's brewery equipment built to last a lifetime; it's brewery equipment made with a love for the details... and with love for our favorite people— the brewers of the world!

mbt Brautechnik plans, designs and manufactures on its own premises to fully meet the expectations of the label: **Made in Germany**. The use of high-quality components from well-known European manufacturers highlights our promise of quality. Our special strengths lie in individuality and creativity. mbt Brautechnik customers can always be ensured that they will receive highly customized products, tailored for their special needs. The experience of our team, coupled with the simplicity of our organizational structure, allows us the ability to produce the most highly individualized products at the most value oriented price – all while paired with highest quality!

Specializing in the construction of brewhouses in a size range of 1 to 50 bbl., **mbt Brautechnik** offers true solutions and full service – from malt to packaged beer. Additionally, due to wealth of experience, we are also highly regarded in the field of retrofitting and upgrading existing brewhouse systems.

Wide portfolio
Industrial breweries up to 50 bbl.

mbt Brautechnik designs, plans and manufactures brewery plants from malt handling to the packaged beer up to a brew size of 50 bbl. All brewing equipment design is exactly tailored to the individual needs of each customer. Both turnkey projects and individual applications are possible and have been successfully completed in the past. In order to keep installation simple and fast, pre-assembly of components (as far as possible) is our standard. Automation can range from fully automated to mostly manual.

Pub breweries down to 1 bbl.

With love and passion, **mbt Brautechnik** designs, plans and manufactures small-scale pub and craft brewing concepts. Brew size can be as little as 1 bbl., with the same reliability and repeatability as the larger industrial systems. Every project has its own special requirements – those are challenges, and not limitations, for the team at **mbt Brautechnik**. Be it stainless or copper clad, frame-mounted or through-the-floor, space constraints or emissions regulations – a solution will be found! Aside from delivering the equipment, we can also provide support concerning the daily operation of the brewery. Due to the

extensive training and long experience of our staff in the areas of brewing technology, mechanical and electrical engineering, all questions from product development to technological challenges will be expertly answered.

Expansions and upgrades

When a brewery grows out of its equipment, **mbt Brautechnik** has the experience to be the partner of choice! In numerous expansion and upgrade projects, we've been able to vastly increase the capacity of the brewhouse, with a minimal requirement for additional equipment. **mbt Brautechnik** is also expert in the replacement of brewing equipment that has met the end of its life cycle; success in this field has the prerequisites of flexibility and knowledge, two hallmarks that set **mbt Brautechnik** apart from the competition.

R&D breweries of all sizes

Scaleability and attention to detail is what sets an R&D brewhouse apart from an elaborate home-brew kit. **mbt Brautechnik** designs, plans and manufactures pilot brewing plants that can accommodate any requirement. No matter how many vessels are required or how many special process conditions exist, there are no limitations when working with our team of specialists.

Automation with Pfenning Braumatik

Powerful software is key when it comes to reliable process control; **mbt Brautechnik** understood this, when we adapted the Pfenning Braumatik Process Control System. This Siemens S7-1500 series-based software package provides everything a brewer needs; user-friendliness, reliability and maintainability have been our key requirements from the first day of development up to the present. The Pfenning Braumatik Process Control System, used in all **mbt Brautechnik** products, is a full-featured, Process Control System designed to make a brewer's job easier.

Our Promise

- Love and passion for the customer, brewing and the underlying technology has always been our motivation!
- We listen to our customers' wishes – they know best what they want and need!
- We strive to be a partner - from the beginning of the project to its end and beyond!
- Simplified company structure helps us to keep our costs low, maintain close personal contact with customers, and gives us the freedom and flexibility to offer real customization in our products!
- Simply put: our approach is to be the most value-able brewhouse manufacturer from **Germany**!

Modular Design

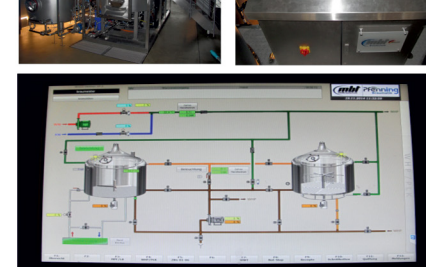

... maybe you need a little more? Your brewery is growing and every day, you get closer to reaching your production limit; it is our goal to help you gradually accommodate growth and optimize your capacity. Together, we will determine the required number of brews and design the right solution for your brewery.

Thanks to our modular brewhouse design, we will always be able to adapt your equipment to your specific needs. Even after many years of operation, brewhouse capacity expansions will be easily achieved — and are only a step away!

Challenge us to find the right solution! We will offer a comprehensive analysis of your process and requirements and will work with you to select the best option: From a single source - with the best quality — at the most-valuable price.

The collage features a newspaper clipping from 'BRAUWELT' with the headline 'Wir entwickeln die passende Lösung' (We develop the right solution). The article discusses MBT's modular design and its ability to adapt to different brewery needs. It also includes a photo of a brewery interior and a photo of a person working on a piece of equipment.

THE RIGHT CHOICE FOR BREWERS

Happy customers
