## Gusmer Cellulose Filter Sheet with DE

# Section 1 - PRODUCT and COMPANY IDENTIFICATION

1.1 Product Identifier

Product Name: Gusmer Cellulose Filter Sheet with DE

Product Code(s): 1560, 1560L, 1575, 1575L

1725W, 1730W, 1730LE, 1735R, 1735W, 1740W, 1745W, 1745LE, 1750W, 1755R, 1755W, 1755LW, 1760B, 1760W, 1765W, 1770W, 1770SH, 1775W

1925, 2925P, 1930, 2930P, 1935, 2935P, 1940, 2940P, 1945, 2945P, 1950, 2950P, 1955, 2955P, 1960, 2960P, 1965, 2965P

IM75, IM83

Chemical Name: Mixture

Synonyms: Cellulose Filter Sheet

1.2 Relevant identified uses of the substance or mixture and uses advised against

Intended Product Use: Filtration

Intended for use only by commercial manufacturers. Not intended for retail sale or use by individual consumers. Uses Advised Against: To avoid exposure to airborne dust, do not damage or abrade filter material. Do not use damaged sheets.

1.3 Details of the supplier of the safety data sheet

Manufacturer/Distributor: Gusmer Enterprises, Inc.
Postal Address: 1401 Ware Street, Waupaca 1401 Ware Street, Waupaca, WI 54981 USA (01)(715) 258-5525 [USA] (product info) Telephone Number: Monday - Friday 8:00am-5:00pm CST Hours of Operation:

1.4 Emergency telephone number

Medical Emergency: 911

Chemical Emergency: (01)(715) 258-5525 [USA] (product info)

### Section 2 - HAZARDS IDENTIFICATION

### 2.1 Classification of the substance or mixture:

Not considered a hazardous material when used in its normal state and use. This product does not release respirable dust when used in its normal state and uses; however this product does contains crystalline silica (CS), which is considered a hazard by inhalation.

## GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)

Carcinogenicity (Category 1A)

Specific target organ toxicity - repeated exposure, inhalation (Category 1)

### 2.2 Label Elements

### Hazard Pictogram(s):

Signal Word: Danger

### Hazard Statements:

May cause cancer by inhalation.

Causes damage to lungs through prolonged or repeated exposure if inhaled.

### Precautionary Statements:

Obtain special instructions before use

Do not handle until all safety precautions have been read and understood.

Do not breathe dust.

Use personal protective equipment as required. F exposed or concerned: Get medical advice/attention

Store locked up.

Dispose of contents/ container to an approved waste disposal plant.

/entilation recommended.

## 2.3 Emergency Overview

Appearance/Odor: White to buff colored filter sheets, generally odorless

Other Hazards: Warning: This product does not release respirable dust when used in its normal state and uses; however this product does contain crystalline silica (CS), which is considered a hazard by inhalation. IARC has classified inhalation of CS as carcinogenic for humans. CS is listed by NTP as a known human carcinogen. Inhalation

of CS is also a known cause of silicosis, a noncancerous lung disease.

Product may form combustible dust concentrations in air during processing. Specifically, in instances where product dust is suspended in air in sufficient concentrations and in proximity to an ignition source. Product as supplied and shipped does not constitute a dust hazard. Users of this product should examine the potential to generate dusts during handling and processing and related combustibility hazards and controls.

## Section 3 - COMPOSITION / INFORMATION on INGREDIENTS

Ingredient(s)	Common Name & Synonyms	<u>Percentage</u>	CAS No.
Cellulose Pulp	Kraft Pulp, Cotton Linter Pulp	20-60%	65996-61-4
Diatomaceous Earth, Natural	DE	0-73%	61790-53-2
Diatomaceous Earth, Calcined	DE	0-73%	91053-39-3
Diatomaceous Earth, Flux-Calcined	DE	0-73%	68855-54-9
Cristobalite	Silica Crystalline, Tridymite	< 37%	14464-46-1
Quartz	Silica, Crystalline Quartz	< 5%	14808-60-7
FDA Approved resin binders & additives		< 5%	NA

### Gusmer Cellulose Filter Sheet with DE

### Section 4 - FIRST AID MEASURES

### 4.1 Description of the first aid measures

Eye Contact: Dust may mechanically irritate the eyes, resulting in redness or watering. Treat dust in eye as foreign object. Flush with water to remove dust particles. Get

medical help if irritation persists.

Skin Contact: Not anticipated to be irritating for product in purchased form, wash with mild soap and water. Use moisture renewing lotions if dryness occurs.

Inhalation: Excessive dust concentrations may cause unpleasant obstruction in the nasal passages. Remove to fresh air. Get medical help if persistent irritation, severe

coughing or breathing difficulty occurs. Ingestion: Not applicable for product in purchased form

### 4.2 Most important symptoms and effects, both acute and delayed

Eve Contact: Dust may cause abrasive irritation to eves

Skin Contact: Prolonged skin contact may cause dryness

Dust may cause nose, throat and upper respiratory tract irritation. Prolonged inhalation of respirable dust containing silica may cause a progressive lung disease, Inhalation:

silicosis and lung cancer. See section 11 for additional information Ingestion: Not applicable for product in purchased form.

Chronic Effects: Silicosis

### 4.3 Indication of any immediate medical attention and special treatment needed

Treatment: No special advice, treat symptomatically.

### Section 5 - FIREFIGHTING MEASURES

### 5.1 Extinguishing Media

Suitable Extinguishing Media: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment

### 5.2 Special hazards arising from the substance or mixture

Products of combustion include carbon monoxide, carbon dioxide and fine particulate in the form of smoke.

Silicon Oxides

### 5.3 Advice for firefighters

As in any fire, wear NIOSH-approved self contained breathing apparatus and appropriate protective clothing.

Product as supplied and shipped is highly unlikely to release sufficient cellulose dust to constitute a combustible dust explosion hazard. Depending on airborne concentration, moisture content, particle diameter, surface area and exposure to an ignition source, airborne cellulose dust may ignite and burn with explosive force in a contained area. Cellulose dust may similarly deflagrate (combustion without detonation like a supersonic explosion) if ignited in an open or loosely contained area. Cellulose dust explosibility: ("Kat dry = >200 and <300 bar m/s). Caution should be taken in the processing, shipping, handling and use of these materials, particularly if they are in a dry state and dust is produced. Reference NFPA standards 654, 69 and the NFPA Fire Protection Handbook for guidance.

\*K<sub>s</sub>, the maximum rate of pressure rise is used to calculate the \*K<sub>s</sub>, value; an internationally recognized index used to classify dust explosibility.

## Section 6 - ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Avoid contact with skin and eyes. Sweep or vacuum up for recovery and disposal. Avoid creating dusty conditions whenever feasible. Maintain good housekeeping to avoid accumulation of cellulose dust on exposed surfaces. Use NIOSH approved filtering face piece respirator ("dust mask") and goggles where ventilation is not possible and exposure limits may be exceeded or for additional worker comfort.

Other precautions: Minimize compressed air blowdown or other practices that generate high dust levels.

### 6.2 Environmental precautions

None, discharge in accordance with federal, state and local laws.

### 6.3 Methods and materials for containment and cleaning up

If large amounts of dust are generated, collect with vacuum or suppress with water spray and sweep up.

See Section 8 for appropriate personal protective equipment Section 7 - Handling and Storage

## 7.1 Precautions for safe handling

Avoid generating excessive dust. If dust levels are suspected to be over PEL, wear a NIOSH approved N95 or greater respirator. Protect from excessive moisture. Maintain good housekeeping practices. See Section 8 for more information

7.2 Conditions for safe storage, including any incompatibilities Store in cool, dry place away from open flame and other sources of ignition.

See Section 8 for OSHA permissible exposure limit(s)

Notes: 1. OSHA particulate not otherwise regulated (PNOR)

8.2 Exposure controls

**Normal Handling Conditions** 

Engineering Controls: If necessary use ventilation system to keep airborne dust concentration below permissible exposure limits. Ventilation to control dust should be considered where potential explosive concentrations and ignition sources are present. The design and operation of any exhaust system should consider the possibility of explosive

concentrations of cellulose dust within the system.

Ensure that exhaust ventilation and material transport systems involved in handling this product contain explosion relief vents or suppression systems designed and

Kst: No Data Available

operated in accordance with applicable standards if the operating conditions justify their use.

Respiratory Protection: If dust levels are suspected to be over PEL, wear a NIOSH approved N95 or greater respirator.

Eye Protection: ANSI Z87+ approved dust goggles or safety glasses, if necessary, to avoid eye irritation.

Skin Protection: Cover skin with clothing and/or gloves if skin dryness or irritation occurs

General Hygiene: Maintain good housekeeping practices, wash hands after handling, avoid direct eye contact. Clean up areas where cellulose dust settles to avoid excessive accumulation of this combustible material. Minimize compressed air blowdown or other practices that generate high airborne-dust concentrations.

## Section 9 - PHYSICAL and CHEMICAL PROPERTIES

## 9.1 Information on basic physical and chemical properties

Physical State: Solid

Color: White to buff colored filter sheet Odor: Generally Odorless

Odor Threshold: None

pH: Melting / Freezing No Data Available Point (Specify): Initial Boiling Point & No Data Available No Data Available Boiling Range:

Flash Point: No Data Available Evaporation Rate: No Data Available

Flammability (solid, gas): lower: No Data Available

upper: No Data Available LEL: No Data Available Explosive Limits: UEL: No Data Available

Vapor Pressure: No Data Available Vapor Density: No Data Available Relative Density: Solubility(ies): No Data Available No Data Available Partition Coefficient (n-No Data Available octanol/water): Auto-ignition Temperature: No Data Available Decomposition No Data Available Oxidizing Properties: Viscosity: No Data Available No Data Available

## Section 10 - STABILITY and REACTIVITY

10.1 Reactivity

No Data Available

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

10.4 Conditions to avoid

Avoid open flame, sparks and other sources of ignition.

10.5 Incompatible materials

Avoid open flame, sparks and other sources of ignition.

10.6 Hazardous decomposition products

Combustion products include carbon monoxide, carbon dioxide and fine particulate in the form of smoke.

### Gusmer Cellulose Filter Sheet with DE

### Section 11 - TOXICOLOGY INFORMATION

11.1 Information on toxicological effects

Toxicology Data: The product has not been fully tested. The statements have been derived in parts from products of a similar structure or composition

 $\begin{array}{cccc} LD_{50} \left( rat \right) & Oral & > 5,000 \ mg/kg & Not \ Available \\ LD_{50} \left( rabbit \right) & Dermal & > 2,000 \ mg/kg & Not \ Available \\ \end{array}$ 

Skin Corrosion/Irritation: No Data Available

Serious Eye Damage/Eye

Irritation: No Data Available

Respiratory or Skin Sensitization:

Acute: Exposure to dust may cause irritation. Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance dust may affect the lungs but reactions are typically reversible.

Acute inhalation of high concentrations of respirable crystalline silica may cause acute silicosis.

Chronic: This product contains crystalline silica. Respirable crystalline silica may cause lung cancer and lung disease (silicosis) if inhaled for prolonged periods. Symptoms of silicosis include wheezing, cough and shortness of breath. Dust may also induce asthmatic reactions via an allergic mechanism, particularly in

individuals who are predisposed to developing allergies.

STOT - Single Exposure: No Data Available

STOT - Repeated Exposure: May cause damage to lungs through prolonged or repeated exposure.

Aspiration Hazard: No Data Available

11.2 Further Information

Mutagenicity: No Data Available

Productive Toxicity: No Data Available

Carcinogenicity: Calcined and Flux-Calcined diatomaceous earth (Kieselguhr) is composed of amorphous and crystalline silica. Respirable crystalline silica (cristobalite) is classified

by the IARC and NTP as a known human carcinogen. Crystalline silica is only known to cause cancer when inhaled in a respirable form. It is not known to cause

cancer by any other route of exposure.

IARC: 1 - Group 1: Carcinogenic to humans (Cristobalite) (Diatomaceous earth (Calcined & Flux-Calcined))
IARC: 1 - Group 1: Carcinogenic to humans (Quartz) (Diatomaceous earth (Calcined & Flux-Calcined))
IARC: 3 - Group 3: Not classifiable as to its carcinogenicity to humans (Diatomaceous earth, Natural)

NTP: Known to be human carcinogen (Cristobalite)
NTP: Known to be human carcinogen (Quartz)

## Section 12 - ECOLOGICAL INFORMATION

## 12.1 Toxicity

No Data Available

12.2 Persistence and degradability

Cellulose fiber slowly biodegrades in water (half life range 1 month - 1 year in freshwater and coastal seawater.)

12.3 Bioaccumulative potential

Not expected to bioaccumulate

12.4 Mobility in soil

Cellulose fiber persists in arid soil (landfills).

12.5 Other adverse effects

No Data Available

# Section 13 - DISPOSAL CONSIDERATIONS

Substance: Dispose of content and/or container in accordance with local, regional, national, and/or international regulations

## Section 14 - TRANSPORTATION INFORMATION

UN Number: Not Applicable
Class: Not Applicable
Proper Shipping Name: Not Applicable
Packing Group: Not Applicable
Marine Pollutant: Not Applicable
Information: Not Applicable

### Gusmer Cellulose Filter Sheet with DE

### Section 15 - REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

TSCA: Diatomaceous Earth and Cristobalite appear on the EPA TSCA inventory list.

CERCLA: Diatomaceous Earth is not classified as a hazardous substance under regulations of the Comprehensive Environmental Response Compensation and Liability Act (CERCLA), 40

SARA 302: No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

SARA 313: This material does not contain any chemical components with known CAS numbers that exceed the threshold reporting levels established by SARA Title III, Section 313. SARA 311/312: Chronic Health Hazard

California Prop. 65 Components:

WARNING: This product can expose you to Crystalline Silica, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

WHMIS Classification: Class D-2-A

WHMIS Ingredient Disclosure List: Silica, crystalline, cristobalite
