 If large amounts of dust are generated, collect with vacuum or suppress with water spray and sweep up.
 Minimize compressed air blowdown or other practices that generate high dust levels.
 See Section 8 for appropriate personal protective equipment.

Section 7 - Handling and Storage

- 7.1 Precautions for safe handling**
 Avoid generating excessive dust. If dust levels are suspected to be over PEL, wear a NIOSH approved N95 or greater respirator. Protect from excessive moisture. Maintain good housekeeping practices. Avoid contact with eyes, skin and clothing. See Section 8 for more information

Section 8 - EXPOSURE CONTROL / PERSONAL PROTECTION

8.1 Control parameters

Cellulose

OSHA PEL

PEL-TWA: 15 mg/m³ Total Dust / 5 mg/m³ Respirable Dust

NIOSH REL

REL-TWA: 10 mg/m³

ACGIH TLV

TLV-TWA: 10 mg/m³ Total Dust

8.2 Exposure controls

Normal Handling Conditions

Engineering Controls: If necessary use ventilation system to keep airborne dust concentration below permissible exposure limits. Ventilation to control dust should be considered where potential explosive concentrations and ignition sources are present. The design and operation of any exhaust system should consider the possibility of explosive concentrations of cellulose dust within the system.

Ensure that exhaust ventilation and material transport systems involved in handling this product contain explosion relief vents or suppression systems designed and operated in accordance with applicable standards if the operating conditions justify their use.

Respiratory Protection: If dust levels are suspected to be over PEL, wear a NIOSH approved N95 or greater respirator.

Eye Protection: ANSI Z87+ approved dust goggles or safety glasses, if necessary, to avoid eye irritation.

Skin Protection: Cover skin with clothing and/or gloves if skin dryness or irritation occurs.

General Hygiene: Maintain good housekeeping practices, wash hands after handling, avoid direct eye contact. Clean up areas where dust settles to avoid excessive accumulation of this combustible material. Minimize compressed air blowdown or other practices that generate high airborne-dust concentrations.
